

Reliable Connectivity for Construction and Engineering Firms

The Quality of Your IT Systems Can Have a **Direct Bearing** on the Work Happening on Site.

The right tools make any job easier and more efficient. That is as true for a shovel-ready project as it is for the internet and networking services that keep the digital elements of your operations connected.

Better project outcomes start with better connectivity

Successful construction projects are measured by the quality and design of the finished structure. There's no shortage of challenges to overcome. Cutting corners might not seem like a big deal in the short term, but it never pays off in the long run.

This is also true for the IT and connectivity that staff depend on to keep projects on schedule and within budget.

Segra provides infrastructure specialists with the IT foundation to take their projects from concept to completion. Our fiber-based services easily handle large CADD files, seamlessly connect virtual teams, and automatically protect your data and team from malicious threats.

More than just internet ...

- High-speed, dedicated fiber internet keeps your staff and devices connected with symmetrical speeds up to 100 Gbps.
- Ethernet delivers dedicated, high-bandwidth connectivity for consistent performance and secure data transfer between locations.
- SD-WAN simplifies your ability to unite multiple locations on the same network for greater control, performance and cost savings.
- EdgeLync offers a flexible and cost-effective way to support your network infrastructure, whether as a high-speed backup or as a primary connection for remote locations.
- Rock-solid digital defenses keep mission-critical systems and sensitive data safe from the threat of cyberattacks in real time.
- Segra voice solutions empower your business with a comprehensive suite of calling and collaboration tools.

Why Segra?

At Segra, we understand that winning in today's business landscape requires more than just technology – it requires a strategic connectivity game plan, relentless agility and innovation, and a human touch.

We invest in our customers, our network and our people to deliver exceptional connectivity solutions and customer service that empower businesses to thrive.

Our local-market operating model means your whole team – from sales to network engineering to customer support – are all living and working in the communities they serve.

Winning Solutions That Get You More
