

# Keeping Schools, Staff and Students Connected

The Quality of a School Depends on the Quality of its **Tech Foundation.**

Computer labs are out, smart classrooms are in. Giving the minds of tomorrow the tools they need for academic success requires more than ordinary IT can deliver.

## The digital foundation of future-focused education

The mission of education is clear: preparing students for the challenges of a world that is constantly changing. Fulfilling that pledge has never been easy, but digital innovation unlocks the potential to take the learning process to new heights while injecting new challenges at every step along the way.

Segra provides public and private schools with the IT and networking solutions required to drive academic success and successfully navigate the e-learning landscape.

## More than just internet ...

- Internet with guaranteed bandwidth, symmetrical upload and download speeds, and dedicated access are ideal for seamless digital instruction.
- Ethernet delivers dedicated, high-bandwidth connectivity with consistent, low-latency performance to support growing classroom bandwidth demands across an entire district.
- SD-WAN simplifies your ability to unite multiple locations on the same network for greater control, performance and cost savings.
- For larger districts with multiple campuses and dedicated IT staff, dark fiber can provide the flexibility to build customized network solutions that scale with district-wide connectivity need.
- Rock-solid digital defenses safeguard network infrastructure and student data from exposure and exploitation.
- Productive remote learning, effective student collaboration and meaningful parent communications begin with a clear, crisp connection.

## Why Segra?

At Segra, we understand that winning in today's education landscape requires more than just technology – it requires a strategic connectivity game plan, relentless agility and innovation, and a human touch.

We invest in our customers, our network and our people to deliver exceptional connectivity solutions and customer service that empower businesses to thrive.

Our local-market operating model means your whole team – from sales to network engineering to customer support – are all living and working in the communities they serve.

## Winning Solutions That Get You More
